# More Than a Cheat Sheet

The Draft Kit is a preseason decision system designed to help a fantasy manager prepare, compare, pivot and act while on the clock.

01

## League-aware rankings

Tiers and recommendations are interpreted through scoring, roster rules and draft context.

02

## Probabilistic projections

A player is shown as a range of outcomes - not a single number pretending to be certain.

03

## Explainable intelligence

Every recommendation includes the value drivers, risks, confidence and a contingency plan.

04

## Connected strategy

Player analysis feeds roster construction, positional scarcity and the Decision Coach.

**RANKINGS TELL YOU WHO IS GOOD.  
THE SUPERCOMPUTER HELPS YOU DECIDE WHAT TO DO NEXT.**

MEET THE FOUR PLAYERS

# Choose a Player

Each card demonstrates a different decision problem: quarterback value, elite-RB risk, wide-receiver foundation and tight-end leverage.

VALUE QB1

MODEL READ

## SEASON OUTCOME RANGE

FLOOR

Low-end QB2

EXPECTED

High-end QB2

CEILING

Low-end QB1

A developing quarterback whose draft appeal comes from usable weekly volume and a path to outperforming a modest acquisition cost.

### VALUE DRIVERS

- Stable starting role and continued development
- Rushing contribution raises the weekly floor
- Price leaves room for roster-building flexibility

### SWING FACTORS

- Passing efficiency must take another step
- QB is deep enough to avoid reaching
- Matchup volatility can affect early-season starts

## DECISION COACH

Target after the primary skill-position foundation is built. Pair with another late quarterback if the room lets him fall.

## SEASON OUTCOME RANGE

FLOOR

Mid-range RB2

EXPECTED

Top-8 RB

CEILING

Overall RB1

One of the highest ceilings in fantasy football, balanced against meaningful durability and workload uncertainty.

### VALUE DRIVERS

- Elite receiving and scoring profile
- Rare week-winning ceiling when fully available
- Offensive role supports premium touch quality

### SWING FACTORS

- Availability remains the central variable
- Age and workload increase downside range
- Manager must protect the roster with RB depth

## DECISION COACH

Draft at an appropriate discount to the top overall tier. Build early running-back depth instead of treating the projection as guaranteed.

## SEASON OUTCOME RANGE

FLOOR

High-end WR2

EXPECTED

Top-10 WR

CEILING

Overall WR1

A volume-driven wide receiver foundation with the target profile and weekly ceiling to anchor a balanced roster.

### VALUE DRIVERS

- Bankable target concentration
- Multiple paths to strong weekly scoring
- High-confidence role supports a stable median

### SWING FACTORS

- Touchdown variance can move the final rank
- Offensive efficiency affects ceiling weeks
- Market price already reflects elite status

## DECISION COACH

A strong selection after opening with an elite running back, or as the first piece of a receiver-forward build.

ELITE TE EDGE

MODEL READ

## SEASON OUTCOME RANGE

FLOOR

Top-6 TE

EXPECTED

Top-3 TE

CEILING

Overall TE1

A premium tight-end asset whose receiving role can create a weekly advantage at the position rather than merely filling it.

### VALUE DRIVERS

- Receiver-like usage at a scarce position
- High target ceiling supports elite outcomes
- Positional separation improves roster leverage

### SWING FACTORS

- Opportunity cost is significant at an early price
- Team passing efficiency affects the ceiling
- Draft room may push the price above value

## DECISION COACH

Take him when the remaining WR and RB options sit in a lower tier. Do not force the pick if the room creates a premium-player value elsewhere.

## THE TAKEAWAY

# Draft With a Decision System

A rankings sheet tells you what the market thinks. The Draft Kit adds projection ranges, confidence, roster fit, positional leverage and a clear next action.

## THE 2026 DRAFT KIT - \$24.99

- Preseason rankings, projections and tiers
- Player-level value drivers, risk and confidence
- Roster-aware Decision Coach recommendations
- Draft strategy built for real choices on the clock

## AFTER THE DRAFT: THE LEAGUE PACKET

The League Packet extends the same engine into the season with customized weekly matchup analysis, lineup recommendations, waiver priorities, injury and role changes, trends, trades, power rankings and league-specific intelligence.

*Draft Kit: prepare and draft. League Packet: manage, adapt and compete.*

**PURCHASE THE DRAFT KIT - \$24.99**
